

## Innovate Biopharmaceuticals to Host Clinical and Scientific Update Event on Thursday, September 6, 2018, in New York City

August 3, 2018

RALEIGH, N.C., Aug. 03, 2018 (GLOBE NEWSWIRE) -- Innovate Biopharmaceuticals, Inc. (Nasdaq: INNT), a clinical stage biotechnology company focused on developing novel therapeutics for autoimmune and inflammatory diseases, announced that it plans to host an event for members of the financial community on Thursday, September 6, 2018, in New York from 8:15am-11:00am. The event will be hosted by Innovate's Scientific and Executive Management Team. A formal invitation with further details will be sent in advance of the event.

For further information about attending this event or to book an individual appointment with Innovate's management, please contact Jennifer K. Zimmons, Ph.D., at +1 917.214.3514 or [jzimmons@innovatebiopharma.com](mailto:jzimmons@innovatebiopharma.com).

Innovate intends to make available a live webcast and subsequent replay of the event on its website. To access the webcast, please visit the tab in the [Events and Presentations](#) section of Innovate's investor relations website.

### **About Innovate Biopharmaceuticals, Inc. (Nasdaq: INNT):**

Innovate is a clinical stage biotechnology company focused on developing novel therapeutics for immuno-inflammatory diseases. Innovate's lead drug candidate, larazotide acetate, has a mechanism of action that renormalizes the dysfunctional intestinal barrier by decreasing intestinal permeability and reducing antigen trafficking, such as gliadin fragments in celiac disease, and bacterial toxins and immunogenic antigens in NASH. In several diseases, including celiac disease, NASH, Crohn's disease, ulcerative colitis, irritable bowel syndrome (IBS), type 1 diabetes mellitus (T1DM), chronic kidney disease (CKD), the intestinal barrier is dysfunctional with increased permeability.

In celiac disease, larazotide is the only drug which has successfully met the primary endpoint with statistical significance in a Phase 2b efficacy clinical trial (342 patients). Innovate successfully completed the End of Phase 2 Meeting with the FDA in 2017 and is preparing to begin Phase 3 registration clinical trials for celiac disease later in 2018. Larazotide has been exposed to more than 800 subjects in clinical trials demonstrating a favorable safety profile comparable to placebo for long-term chronic administration. Larazotide has received Fast Track designation from the FDA for celiac disease.

### **Forward Looking Statements**

This press release includes forward-looking statements including, but not limited to, statements related to our operations and business strategy. The forward-looking statements contained in this press release are based on management's current expectations and are subject to substantial risks, uncertainty and changes in circumstances. Actual results may differ materially from those expressed by these expectations due to risks and uncertainties, including, among others, those related to our ability to obtain additional capital on favorable terms to us, or at all, the success, timing and cost of our drug development program and our ongoing or future clinical trials, the lengthy and unpredictable nature of the drug approval process, and our ability to commercialize our product candidates if approved. These risks and uncertainties include, but may not be limited to, those described in our Annual Report on Form 10-K filed with the U.S. Securities and Exchange Commission (the "SEC") on March 14, 2018, as amended, our Quarterly Report on Form 10-Q filed with the SEC on May 15, 2018, and in any subsequent filings we make with the SEC. Forward-looking statements speak only as of the date of this press release, and we undertake no obligation to review or update any forward-looking statement except as may be required by applicable law.
