### **About Innovate Biopharmaceuticals, Inc. (Nasdaq:INNT):**

Innovate is a clinical stage biotechnology company focused on developing novel therapeutics for autoimmune and inflammatory diseases. Innovate's lead drug candidate, larazotide acetate, has a mechanism of action that renormalizes the dysfunctional intestinal barrier by decreasing intestinal permeability and reducing antigen trafficking, such as gliadin fragments in celiac disease, and bacterial toxins and immunogenic antigens in nonalcoholic steatohepatitis (NASH). In several diseases, including celiac disease, NASH, ASH, Crohn's disease, ulcerative colitis, irritable bowel syndrome (IBS), type 1 diabetes mellitus (T1DM), chronic kidney disease (CKD), the intestinal barrier is dysfunctional with increased permeability. On October 7, 2019, the Company announced that it had entered into a definitive merger agreement pursuant to which the Company agreed to acquire all of the outstanding capital stock of privately held RDD in an all-stock transaction. This transaction includes a concurrent capital raise led by OrbiMed Advisors LLC. After closing the Company plans to change its name to 9 Meters Biopharma. The transaction is expected to close before the beginning of the second quarter of 2020, subject to the completion of the remaining closing conditions and receipt of regulatory approval in Israel.
